# The Maxi-Mix Silo System delivers pre-mixed mortar and grout in an instant, to keep your project flowing smoothly

- Smart contractors and builders have discovered how Maxi-Mix can save them the expense, labour and time of on-site mixing.
- We computer-blend our dry mortar and grout mixes to your specifications in our state-of-the-art plant in Milton, Ontario. Batch after batch, you'll get consistent quality delivered right to your job site.
- You'll save on labour costs because there's no on-site mixing or bag handling. No messy sand piles! And one operator can supply up to 20 masons.
- Your job site will be safer, cleaner and more secure without the usual clutter of pallets, mixers and messy bulk bags.
- No more worries about weather contamination or thawing of sand piles affecting the quality of your mortar or grout, thanks to our self-contained silos!
- You'll save money by reducing theft - there are no bags to store or steal! And you'll never have to worry about over-ordering, because leftover product is credited to the contractor (some conditions may apply).
- Clean-up is quick and easy! Ten minutes with a hose at the end of the day will keep your project moving the next.
- You'll never run out of product - our pneumatic tankers will refill on-site, to keep your busy jobs running smoothly and without interruption 'round the clock!
- You'll save time because you won't need to load/unload bulk bags, order from two companies or maintain mixers.

## Quality mortar or grout, as easy as 1-2-3!

### 1. WE DELIVER TO YOUR SITE

Set-up takes 20 minutes and only 8' of space! Just hook up to water and electricity or simply set up your own mixer under the silo.

### 2. THE SILO STARTS MIXING

Press a button, adjust for consistency and presto! You've got it made! Maxi-Mix will give you batch after batch of mortar or grout, mixed to spec.

### 3. WE REFILL ON-SITE

Tell us when the level reaches the red line and we'll send a bulk tanker within 24 hours to top up the silo. No down time!

Our Maxi-Mix Silo can also be elevated, allowing masons to use their own mortar mixers!

Residential project, Firstview Homes.

The Maxi-Mix Silo System is designed to help architects, spec writers, builders and contractors save the expense, labour and time of on-site mixing for jobs such as:

- Residential subdivisions ● Schools ● Hospitals ● Strip malls
- Shopping centres ● Hotels ● Office buildings ● Condos
- Factories ● Other large-scale projects

Our extreme quality control is your guarantee of consistent results.  
Find out today how you can have it made with Maxi-Mix!

## Our Products

All our product is accurately weighed and proportioned with dried sand, to applicable standards, then filled into a 35-ton silo and delivered directly from our plant to your job site. Pre-coloured mortars are available from a standard colour range or customized to match specific brick. Thanks to our automatic weighing and computer-controlled production, you'll get the right colour - exactly as specified - from start to finish.
